

Eye of the Tiger Presents.....

OptoMap Retinal Photography

Dr. Sheth and Dr. Patel are proud to present their patients with the latest in eye care technology. We now have a way to assess the overall health of your retina **WITHOUT DILATION DROPS!**

We have used this technology to discover many important health conditions that would have been missed without following these proper procedures during eye examinations. We know you will be pleased with the results.

We highly recommend the OptoMap scanning laser exam because of these benefits:

- Most patients can avoid having their pupils dilated with drops.
- Fast, easy, and comfortable
- A more complete view of the back of the eye (retina) than has been possible previously.
- A digital record of your retina that becomes a part of your medical record indefinitely.
- Helps us detect changes from Diabetes, high cholesterol, high blood pressure, Macular Degeneration, tumors and other diseases.

Insurance Coverage:

The only way we can submit this test to your medical insurance is if there is a medical finding or diagnosis in your eyes. Drs. Sheth and Patel will determine this after examining your pictures and eye health. If everything is extremely healthy, which we hope it is, the value of the OptoMap pictures is **\$30.00**, which we will collect at the time of check out.

Acceptance

I am accepting the opportunity for a Retinal Image and review of my retina
